

PRECISION DAYLIGHTING, INC.

*A Soft Dig
is a Safe Dig!*

Precision Daylighting Inc. is a Hydrovac Service Company that specializes in safe and efficient excavating, also known as "Soft Dig." Precision Daylighting hydrovacs are unlike the air-vacs, sewer-suckers, pressure washers, vacuum trucks and other vacuum excavators that many others may have experienced. Precision Daylighting's hydrovacs are powerful and efficient equipment capable of moving large quantities of earth. They can also cut precise slot trenches and daylight (pot hole) holes to expose buried utility lines. By using Precision Daylighting's services, the chance of rupturing pipelines, damaging utility cables or severing fiber optic lines is practically eliminated.

Precision Daylighting's hydrovac services utilize pressurized water and a powerful vacuum system to excavate, pothole, daylight and efficiently expose buried utilities. The water is delivered through a handheld wand to cut through soil, which is simultaneously removed by the vacuum allowing for safe excavation in congested areas and frozen ground with minimal ground disturbance.

Precision Daylighting Inc. Hydrovac Services Include:

- ***Daylighting (safely exposing underground utilities)***
- ***Utility Exposure (known and unknown)***
- ***Slot Trenching***
- ***Piling Holes (Piers)***
- ***Pot Holing***
- ***Confined Space Excavation***
- ***Debris Removal***
- ***Culvert Cleaning***
- ***Remote Excavation***
- ***Frozen Ground Excavation***
- ***Pipeline Tie-Ins***
- ***Utility Pole Holes***
- ***Foundation Exposure***
- ***Retention Pond/Catch Basin Clean***
- ***Hydro Excavation***
- ***Utility Anchors***
- ***and Many More***
